BRITA in PuBs

26th of April 2007

Open day at BRITA in PuBs demonstration building Filderhof

On Saturday, 21st April 2007 the BRITA in PuBs demonstration building Filderhof, a nursery home for people with dementia opened its doors for the interested local public. The building has been closed for more than a year due to the energy efficient retrofit of the main building and the erection of an extension. By the end of April the occupants will move into the building and the monitoring of the energy consumption as evaluation of the energy concept will start. Read more about the event and see photos of the building on the homepage.

Surprising results at Borgen Community Centre

An air quality user survey shows surprising results as the indoor temperature seems to be the only relevant factor for satisfying students' needs of a comfortable indoor climate. The overall impression is that the students' experience of air quality and temperature to a large extent is psychology. Read more about the survey on the homepage.

BRITA in PuBs Building Diary updated

During the following "last year" of the EU-project the monitoring of most of the demonstration-buildings will provide an informative basis for the relevance of energy efficient retrofit measures for the European building stock. The building diary is now updated and available at the homepage.
